The [Equitable Drug Pricing and Patient Access Act](#), introduced in the New Jersey Assembly on April 10, 2025, would require the reimbursement rate for prescription drug services paid to a pharmacy providing prescription drug services to Medicaid beneficiaries to not be less than the national average drug acquisition cost of the drug plus a Medicaid fee-for-service professional dispensing fee of \$10.92. If enacted, the Bill would apply to Medicaid fee-for-service and Medicaid managed care plans. Additionally, the Bill would mandate that all Medicaid managed care contracts include pharmacy choice as a benefit, so enrollees could choose any qualified pharmacy that is a contracting provider, and no qualified pharmacy would be denied the right to become a contracting provider under the same terms and conditions as existing contracting pharmacies, as long as the pharmacy accepts the contract's terms.
